## Soaring Skies Federation

Dear Colvestone Nursery Class children and families,

I hope you are all well, staying safe and keeping busy at home. I hope you have been able to do some of the ideas from the home learning pack that I sent home with you. This week would have been the start of our summer term. I hope you all had a nice relaxing Easter break! I think of you and your families often and miss seeing you.

I have noticed on my daily walk the beautiful spring flowers and the new bright green leaves on the trees. I have heard the birds singing and even saw a little robin. Can you see any signs of spring? The nursery garden had some colourful spring tulips, it was such a shame that we could not see them bloom into beautiful flowers. Can you draw some flowers and trees?

This term we are going to learn about things that fly in the sky. Our topic is called 'Up in the Sky.' You can see the Nursery Class home learning ideas on the school website each week.

Do you remember our caterpillars that had made their chrysalises? They turned into butterflies and I took them to a community garden and released them. They must be enjoying this lovely sunshine that we are having this week! Have you seen any butterflies? You could draw or make a butterfly at home. What other insects can you see flying? Do you know what they are called?

I hope you have been able to keep active. I miss our 'Daily Mile' runs around the playground. I have been doing 'PE with Joe Wicks' on YouTube every weekday morning at 9am. Maybe you could join in too!

Wishing you and your families all the very best from Miss Sarah, Colvestone Nursery Class Teacher.
