

Soaring Skies Federation

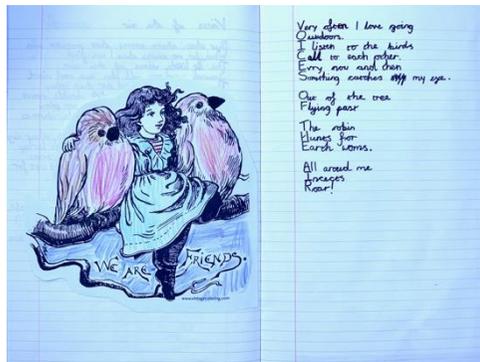

Hello Year 3,

I hope you enjoyed your break especially the GLORIOUS sunshine we had and that you got a chance to fit some learning in as well.

I have a very special task for you this week Year 3 if you choose to except it. I have been doing some volunteering with a local care home called 'Silk Court' in Bethnal Green. Much like most of us the people that live there haven't had a chance to see their family, friends or even the outside world in a very long time in order to stay safe. As I know how excellent you are at cheering me and your classmates up I thought it would be a good idea for us to write letters to them to help brighten their day and when I told them they loved the idea. The letters can include kind messages, drawings, poems or recipes, anything nice you can think of. Although just like when you are talking to someone online please don't include personal details like your address, phone number or full name. If you're not sure how to start them off 'Dear Friend' is always a good place to start. Apart from that it really is up to you! When you have completed your letters you can bring them to our upcoming book swap, email me a scan of them to admin@colvestone.hackney.sch.uk or type them up and send them through in an email so I can print them out. I hope to deliver them by the end of next week and I'm really excited to see what you come up with and I know they are too!

Your writing and topic task this week is all about the first landing on the moon, which I'm sure you will agree, was a very important moment in history. You will need to research Neil Armstrong and his crew and try to put yourself in the shoes of those brave astronauts as they made their 'One small leap for mankind..' You will need to create and answer some interview questions, a fact file and begin to think about the features of a news report.

Maths this week is all about Fractions, now as we didn't get the chance to cover this in class I have started it off quite simply, if you feel like you have got the hang of it there are some fractions games to challenge yourselves in Education City. Remembering that $\frac{1}{2}$ is one of two parts of a whole and $\frac{1}{4}$ is one of four parts of a whole will help you along the way. If your feeling hungry you could even create your own fractions pizza with different toppings on each fraction !
