

Colvestone Primary School

"Educating the mind without educating the heart is no education at all."
Aristotle

We have developed a two year curriculum which enables us to deliver our vision for the Colvestone child. Our curriculum is responsive to the children’s interests (through pupil voice meetings), general interests of the school community and local/global influences + trends.

Our commitment to the development of the whole child means that Heritage is covered every year in the Autumn term – learning is underpinned with the children developing a sense of themselves within the world and their identity.

The National Curriculum drives our expected outcomes but our Learning vehicle is an embedded cross curricular approach. We use whole school themes to create an ethos of community learning (cross age experiences form a positive platform for dialogue at home) and give our children exposure to a multi-disciplined learning style.

English, and the skills of, run through the core of our curriculum. Class books are chosen in line with the curriculum theme and each child has their own personal copy to promote reading for enjoyment and the dream that each child has their own personal library by the time they leave our school.

Curriculum drivers allow us to ensure that all domains of the National Curriculum are given status and allow children to thrive in all learning areas of their school setting.
